

Downgrade iPhone Firmware

What you need:

- [iTunes 7.4](#) or later
- iPhone Firmware [1.0](#), [1.0.1](#), or [1.0.2](#).
- [AppTapp](#)

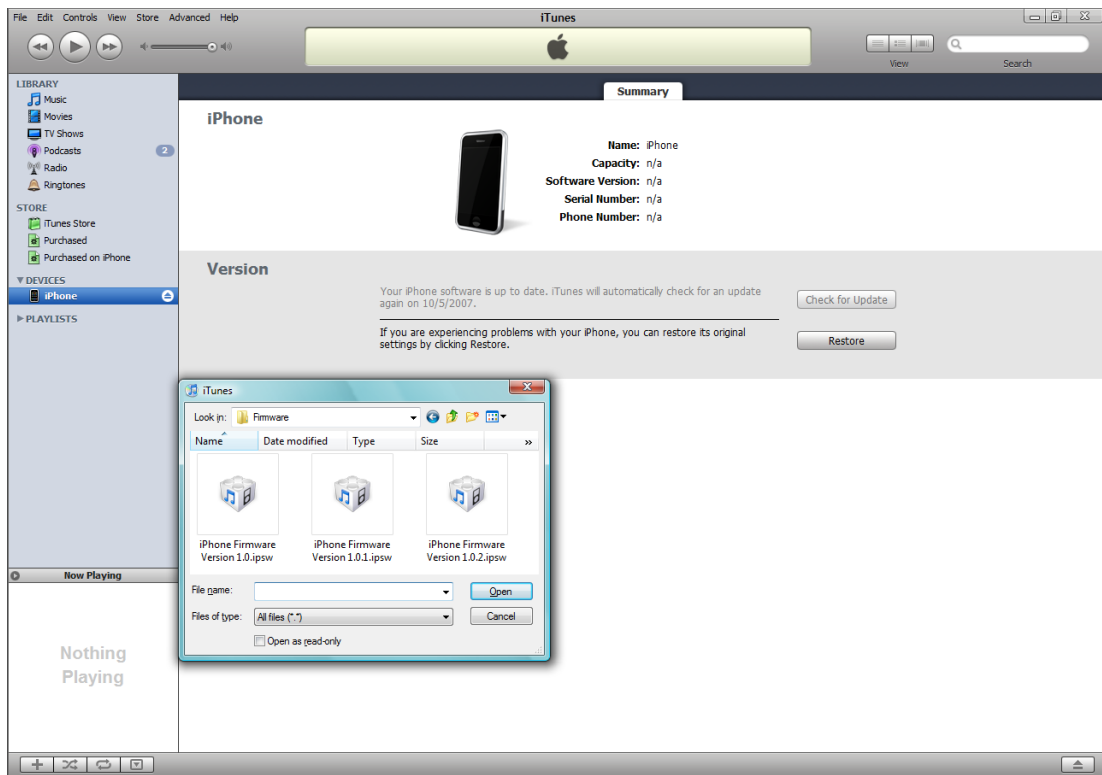

1. Start iTunes
2. Plug the iPhone into your computer.
3. Reboot the iPhone in **Recovery Mode** – Hold down the Sleep/Wake button and the Home button for ten seconds. Release the Sleep/Wake button but keep the Home button held down.

4. iTunes will say it has detected an iPhone in recovery mode. Press OK.

5. Shift+Click the Restore button in iTunes. Navigate to the location of the desired firmware version.

6. Run the restore.

7. An error will appear at the end of the restore. Ignore it and press OK.

8. A message will appear on your iPhone saying “Please Connect to iTunes.”

9. Close iTunes.

10. Run AppTapp.  It will get an error, but it will bring the iPhone to the activation screen.
